

RAYMOND

The site of the One Million Dollar Factory of the Canadian Sugar Factor-ies, Ltd. In the center of the beet-raising district of Southern Alberta.

Raymond Recorder

RAYMOND

A live town in a rich agricultural and stock-raising district. A good place to make your home.

Vol. 29

FRIDAY, JULY 11, 1930

No 16

News Notes

Mr. and Mrs. Ross R. Mny were in Raymond on Monday evening.

Lou King is in Calgary this week playing a series of dances at the Memorial Hall with King's Kanadians.

N. C. Jeffrey returned home last week after being away working for a couple of months.

Mr. and Mrs. Athol Cooper spent the week visiting in Raymond with relatives.

G. S. Browerton and wife were Raymond visitors on Monday this week.

J. C. Shaw and plastering crew of Cardston are working on the 2nd Ward Church now.

Kathryn Llewellyn of Lethbridge is spending her holidays here with Miss Norma Litchfield.

J. B. Ririe and sons have a large number of sheep in the Calgary Fair and W. H. McIntyre has quite a number of cattle.

The Taber "M" Men Baseball team were here for a game on Wednesday afternoon with the 1st Ward team. Raymond won 11-3.

Monday the mercury was 99 in the shade and Tuesday was about as bad. A few drops of rain fell on Tuesday morning.

The Short Course School was held at the Raymond A. C. this week with twenty seven School Fair prize winners attending.

There was a large contingent from Raymond and the district south at the U.F.A. Convention in Lethbridge on Monday this week.

After much study the Crow's Nest route has been selected as the most feasible air-mail route over the Rockies to the Coast.

Raymond and Stirling Seniors played here Monday evening, the local nine winning 13-0. Stirling is just reviving baseball over there, and are doing well at it.

St. A. Canon Doyle, spiritualist and noted author is dead, a victim of heart failure. He was the creator of "Sherlock Holmes," famous detective character.

Geo. Romeril is out south of town now with his big grading outfit. The grades are nice and high and when packed should make a real good road.

J. G. Parker, Nobleford farmer was accidentally killed when struck by the wing of a airplane at a picnic at Rocky Coulee on Friday, July 4. The coroner's jury returned an open verdict.

Dr. J. S. Stewart, Lethbridge is the Conservative standard bearer for the Lethbridge Federal Riding, opposing T. O. King, Raymond, U. F. A. candidate, and A. G. Baalim, Lethbridge, running for the Liberals.

Best farmers should read carefully the article on irrigation in this issue. After testing moisture conditions on 12 farms at various points in the district that all were lacking moisture and in every case from 4 to 7 inches were needed. Use the water and increase yields.

Mr. Longman of the Raymond A.C. is checking up now on the results of the test plots of fertilizer and reports some outstanding results. In every field the fertilized plot is better in every way. Some farmers are now ordering fertilizer for next year's seedling.

Carke Lund won first money in the Bareback Bucking Horse riding at the Calgary Stampede. He "kicked, seuffed and scratched his way to first money in a hair-raising ride on 'Blue Jay,'" according to the Calgary Herald. Good boy Clarke, let them hear from Raymond.

T.O. King Is U.F.A. Nomination

LOCAL FARMER DEFEATS JELLIFF, FORMER MEMBER, FOR NOMINATION OF U. F. A. PARTY IN LETHBRIDGE RIDING

SIX CANDIDATES NOMINATED AND T. O. KING WINS OUT IN FIFTH BALLOT—NOMINATION IS MADE UNANIMOUS—CANDIDATE TELLS DELEGATES HE FAVORS PROTECTION—JELLIFF DROPPED ON FOURTH COUNT

T. O. King, Raymond old-timer, successful farmer, president of the Alberta Trustless' Association, member of the Canada Grain Standards Board and holder of numerous public offices in the community for years, will carry the U. F. A. banner in the federal election. Mr. King was selected at a largely attended convention of farmers held in Wesley Hall, Lethbridge, on Monday, defeating N. F. Priestley of Lethbridge, formerly of Condale, in the fifth and final count by 138 to 89.

L. H. Jelliff, who has been the U. F. A. member in the Dominion parliament for the past nine years, went down on the fourth count with L. H. Jelliff T. O. King, H. Ostlund, K. C. N. F. Priestley, Fred Pease and John Johanson, nominated, the balloting was as follows:

The first count resulted as follows: King, 59; Jelliff, 55; Ostlund, 46; Priestley, 43; Pease, 17; Johanson, 8 (Johanson drops out.)

The second count: King 63; Jelliff 56; Ostlund, 48; Priestley 45; Pease 16. Pease drops out.)

The third count: King, 64; Jelliff, 56; Priestley, 55; Ostlund, 49. (Ostlund drops out.)

The fourth count: King, 94; Priestley, 73; Jelliff 56. (Jelliff drops out.)

The fifth and final vote resulted as follows: King, 138; Priestley, 89.

Made Unanimous

The nomination was made unanimous on a motion proposed by N. F. Priestley. John Johanson moved a hearty vote of thanks for the services given the party by Mr. Jelliff during his nine years at Ottawa. Mr. Jelliff was called upon to respond but he was not present at the time.

In thanking the convention for its action in giving him the nomination Mr. King appealed for united support as this was necessary if the U.F.A. was to carry the riding. A committee meeting was held following the convention when Mrs. Fred King was placed in charge of the campaign office which will be opened in Lethbridge at once.

Large Representation

This action by the farmers somewhat clarifies the local political situation as it places Dr. J. S. Stewart, Conservative, and T. O. King, U.F.A. definitely in the field with A. G. Baalim, provisional Liberal candidate now a third contestant. A vigorous campaign is certain. Mr. King was assured of the support of the defeated candidates for the nomination and was given an enthusiastic and united endorsement by the convention, one of the largest ever held by the U.F.A. In this riding. One hundred and twenty-six delegates were seated and despite the terrific heat in the convention hall the deliberations were followed with close interest. Keen interest was likewise displayed by the general public for the afternoon session the galleries were crowded.

SEEN THIS WEEK

Reg. Cooper, executing judgment at the Raymond-Taber Baseball game.

Rayo Woolf challenging Ken Allred for a race.

Ross Humphreys trying to get rid of a "charley horse" without success.

Ye Editor wiping sweat with one hand and running the press with the other.

J. W. Evans looking into the lack of moisture for beets.

New Dayton Wins Final

Why Don't You Irrigate?

Letting your crops suffer for moisture while the canal is full of water, is as foolish as for a man to starve to death while the cupboard is full of food, just because his wife is not there to set the table.

Every one will admit that a soaking rain would be of great benefit to the crops at the present time, and so would a consistent irrigation. The only difference in value would be in the method of application. Yet there are people with a good water right and splendid crop prospects who are foolishly waiting for rain instead of applying the water to the suffering crops.

The growth of the plants depends, in a large measure, upon the moisture content of the soil for it is through the available water in the soil that the plant food is taken up and carried by the rootlets to the plant. No matter how fertile the soil if there is not sufficient moisture in it, there will be no growth; hence the necessity of supplying the necessary moisture.

Don't wait for rain. Should there come rain even in excess of anything ever recorded for the month of July it would not be sufficient to give the maximum of growth to the plants. According to careful experiments conducted over a period of ten years by the Irrigation Branch of the Department of the Interior, Sugar Beets require a water supply as follows: 1 inch in May, 2 1/2 inches in June, 8 1/2 inches in July, 5 inches in August, and 2 inches in September.

Several soil tests to a depth of four feet have recently been made in the beet fields of this district, and these show a very serious deficiency of moisture. The average available moisture is only 7 p.c. of what it ought to be in the fields tested, and these fields are fairly representative of the whole district. Most of the beet fields can be irrigated. Why not supply the water so the plants can grow and give you the heavy yields so desirable.

There is plenty of water now (it may not continue so). The soil is very dry. The plants are suffering. It is foolishness in the extreme to defer irrigation under prevailing conditions.

"The fool hath said in his heart."

"I will let my water go by and wait for rain."

The wise man says: "I will use my water and pray for rain."

USE THE WATER. It pays to irrigate.

Canadian Sugar Factories.

News Notes

Dick Wolfe was in Calgary for the Stampede part of this week.

Quite a few signs have been painted about town this week. "Pappy" Wellsford is the artist.

Because of the increasing volume of business between here and Cardston a new long distance line is being built which will materially speed up the service on long distance calls.

Magrath Fair July 23 and 24

The Prize Lists are now out for the Magrath fair to be held on July 23 and 24 and local people should obtain copies from the Secretary J. M. Watson and exhibit their livestock and produce at this fair.

Like a good many other things of real value two or three people cannot make a fair. It takes the co-operation of the many to make a fair the success it should be, and while prizes may not justify the expenditure of time and effort, we should not forget that an exhibition of this kind is a great advertising medium, and if you don't win a prize, you are doing some real boosting for your district.

Consider the Money expended for the great Empire Exhibitions. What for? To advertise the countries of the Empire. Let's do our part to make the Magrath Fair bigger and better. Get a Prize List.

Open Air Meeting

Pres. Edw. J. Wood, of the Alberta Stake of Zion, with a number of missionaries from the Northwestern States Mission, will be in Raymond, Saturday evening, July 12th and will hold an open air meeting probably near the Raymond Mercantile Store, commencing at 8:30 p.m. The public are invited to this meeting where a good program of singing and speaking will be offered.

L. D. King is attending the Calgary Stampede this week.

Fascinating Links in Canada's History

Ottawa, July 10 (Special to the Recorder)—Juan de la Cosa, who accompanied Columbus as a cartographer, on his exploration and finding of North America, returned to Spain in 1500 and shortly after drew a map of the country which they had discovered and the country traversed in the journey. It is supposedly the first map which includes North America and was mislaid and not found until 1832 when the original manuscript was discovered in Paris. At the time only 50 copies were made and the Dominion Archives, at Ottawa, is the proud possessor of one of the copies. The map is 40 by 75 inches and is of interest even to the most vague person seeking information regarding the early history of Canada.

It is in color and to depict the winds, La Cosa uses four heads of men and the expression of their faces show whether they are favorable winds or not. Countries are divided by the picture of Monarchs sitting on the thrones, this mostly being in the Eurasian district. The three wise men are shown following the star, in the portion which is reserved for the Holy Land and the temple of Babylon and Libia are shown in their respective niches.

Perhaps it is a legend but an interesting tale is told regarding the map. At once it is noticeable that if it were being studied by four people around a table, each one would face printing directly in front of him. The legend runs that the nobles objected to having to read such maps upside down so this strategist made his map in a manner that all would be satisfied.

Trading posts on the coast of Africa and the Mediterranean are conspicuous. It is very remarkable the clear way in which LaCosa sketched the East Coast to Florida and it is the wonder of the present day of how he was able to achieve this after his voyage.

Of the 35,000 maps which are in the map room of the Archives LaCosa's map is one of the most interesting and is well worth a great deal of study. Students studying the early life of the country view it with deep regard for the excellent work done by the cartographer.

The Lure of the Maritimes

makers from all parts of eastern Canada and United States. Their many sea-side resorts; quaint and beautiful little villages and snug towns dotted along the Bay of Fundy have a special attraction for those who wish to combine comfort with scenic beauty; golf and a wide variety of other sports with fishing and sailing; and the whole with modern and direct transportation.

St. Andrews-by-the-sea with its well known and excellent Algonquin Hotel. There, as at its more famous namesake in Scotland, is to be found one of the outstanding 18-hole golf courses in Eastern Canada where many a hard-fought championship has been decided. Again, take Digby on the Bay of Fundy. Set in some of the most beautiful, old-world scenery

in Canada, the Pines, recently opened hostelry, offers a wide range of entertainment including tennis, golf, sailing, fishing, hiking, horseback riding, motoring, swimming either in the sea or in the salt water pool with plate glass windscreens and promenade for spectators nestling under the veranda of the hotel. Good motoring roads give access to scores of quaint little villages, some of them, in the Evangeline country, scenes of historic incident and tragedy. Here too, the modern autoist will often meet the old-world ox wain taking its leisurely way down the country road. Lay-out shows hand-spring dive into the Pines Hotel pool; Evangeline country showing church and statue at Grand Pre; and section of course at St. Andrews.

The Maritimes hold a proud and well-merited place in tourist popularity as well as being a favorite territory for holiday-

T. O. KING

People of Raymond and district were highly elated when news came back of the nomination for the Lethbridge Federal Constituency of Mr. T. O. King as U. F. A. Standard bearer.

The choice was not only a popular one, as Mr. King is well known all over Southern Alberta but a very wise one as well, as he is certainly well acquainted with the problems confronting Western Canada today. Serving in public capacities for 39 years, ever since he came to the country, he has watched the district grow from infancy to childhood and on to maturity, and knows the problems that have been solved and that remain to be solved.

Successful in business as well as farming, interested in education and higher learning Mr. King, if elected, can carry with him to Ottawa a back ground of personal experience in Southern Alberta that will make his judgment of paramount value to those in charge of affairs.

To those who assisted in Mr. King's nomination we offer congratulations and thanks. The fight is on. It is to be hoped it will be a fair one and that when election day arrives the electors will be prepared to vote for the man who will best represent the people of the district and their various needs.

There will be much discussion of the problems confronting Canada at the present time, and we often wish we had the wisdom to see the feasibility and possibility of all of the election propaganda put forth, but we have not. Our only hope is that distasteful personalities and comparisons may be left out of the campaign and after voting day we can all say that we are ready to support the winner of the contest wholeheartedly.

THE CITIZEN'S DUTY

There will be an election in Canada on July 28. At that election the question of who shall be governor and administer the affairs of the people of Canada will be decided. The election therefore has a vital bearing upon the life of every one of us. Matters of taxation, the development of the country, the providing of work for our people, the giving of opportunity to our son and daughters, the maintaining of harmony within our borders and of the closest relations with the Motherland and the rest of the Empire, tariff matters, and many other vital questions come within the purview of the Dominion Parliament. This all being so, it is imperative that everyone of us claiming to be a good and true Canadian shall approach this "Grand Inquest of the Nation" with a deep sense of responsibility. It is not sufficient discharge of duty on our part to merely look upon a General Election as a chance to get our party in and keep the other party out.

Canada is a young country, a forward looking country. It cannot be held in the grip of yesterday. It is like the embryo chicken in the shell. It must burst the shell and come forth in order to live. To stay in the shell means that the chicken will go rotten and die. The bursting of the shell sets the seal on life. We men and women of Canada must always be looking ahead and stop imitating Lot's wife who looked behind and got preserved in salt for her pains. For these reasons and they are good sound reasons we must meet the coming elections with seriousness and sincerity not with the lightheartedness of joy-wagoners nor the insincerities of the practical politicians. The problems of our country's administration should be considered and studied. The best policies for the welfare of Canada and the manner in which we Canadians can make our best contribution to the life of the world in which we live, these should be our concern rather than flapping of speakers on the hustings or the pull of inherited party learnings.

Our votes must be delivered for Canada to ensure its best development within the Empire, and for efficient administration of the national heritage. We should study the party platforms and satisfy ourselves as to the best policy for the country keeping in mind the fact that this is a young country and a growing one. If we give our votes to men of character ability and honesty and support parties whose programmes are in our judgment likely to be helpful to the

country, then we shall not go far astray. Somehow or other the best laid schemes of crooked politicians go astray and there is a divinity that shapes the end of countries and peoples. No party can steal Canada; none give it all away. Let each of us do our part unselfishly, without partisanship, without fear or favor, and the General Elections will prove a new baptism of power for Canada.

SCHOOL FAIR SHORT COURSE

The School Fair Short Course is now being held at the School of Agriculture; with 27 present 14 girls and 13 boys. These young people come from all parts of Southern Alberta one girl coming from Comby district, 29 miles South of Manyberries. It is the opinion of all the instructors that this group although perhaps not as high Academical as some in the past, is one of the finest groups we have ever had.

News Notes

Born to Mr. and Mrs. Bert Still at the home of Mrs. Boyson on Wednesday, July 9th, a baby girl. Mother and babe are doing nicely.

Don't forget the open air meeting to-morrow night on Broadway when Mission Pres. Wm. R. Sloan and 6 missionaries from the Northwestern States mission caravan will be here to speak to us.

Another heavy rain Thursday afternoon was welcome indeed and will bring the precipitation on Thursday to near $\frac{1}{4}$ of an inch. This will soak down about four inches on wheat and beet land and will make a wonderful difference in the crop prospects.

Quite a large crowd of Raymond people, including the Stake Presidency and the Bishops of both wards, were in Stirling on Sunday for the dedication of their beautiful new L.D.S. Chapel there. This makes three lovely chapels dedicated, and two more under construction in the six wards.

Rulon Boyson son of Mrs. M. W. Boyson and his chum Wm Carr, arrived here last Sunday for a visit driving from Provo, Utah in 2 1/2 days and spending a half day in Yellowstone Park. On Wednesday, the visitors and members of the family spent the day at Waterton Park.

Mrs. Wm. Clemis was the guest of honor at a farewell social at the home of Mrs. T. Allen given by the W. I. board on Thursday June 10th. A pleasant afternoon was spent at the close of which Mrs. Clemis was presented with a china fruit dish. The good wishes of the W. I. go with Mrs. Clemis to her new home in Lethbridge.

A new type of motorcycle said to be the "missing link" between the motorcycle and bicycle, will shortly appear on the Canadian market, dispatches from England indicate. The new machine, weighing only 167 pounds, will retail in England, fully equipped at \$121.00. It will be slightly higher in Canada.

Paris—A pneumatic rubber automobile bumper has been put on the market by a French firm. The bumper consists of a slightly curved steel bar to which is attached a cylindrical rubber casing containing an inner tube. The surface of the bumper is moulded and it presents the appearance of the tread of an automobile casing.

BOYS MAY BE GRAIN KINGS

Canada is still a country where opportunity awaits the young men of intelligence, energy and the will to persist. Who knows but some of the young men now associated with some of the various junior grain clubs may be crowned king of the grain classes in 1932. A hard headed old prize winner ventured the remark the other day that this like many another thing that happens every day. The younger man has vim energy and the advantage of everything that is up to date in research and experiment. He is sure to make the older man rustle for a place among the winners. J. B. Annable, president of the Moose Jaw agricultural society, speaking recently at a meeting of one of these younger men's registered seed clubs sponsored by the board of trade of that city voiced a much similar opinion. "These boys," said Mr. Annable "may be winners of high prizes at the Worlds Grain Show at Regina in 1932. There two crops for them to select from and they are starting with the right kind of seed to make a good showing. Fortunately they are located in a district that stands high in the production of high quality wheat."

Firestone
BALLOON
for Speed with Safety

Most Miles
Per Dollar

FIRESTONE now announces another new tire—again built in advance of today's car requirements. This new Firestone Heavy Duty Gum-Dipped Balloon surpasses in strength, in toughness, in traction and in wear-resistance, any tire that even Firestone ever built before.

This new tire provides a wide margin of safety at any speed on any road. It has a deeper tread, extra sidewall thickness and scientific construction of alternating plies of live cushion gum and Gum-Dipped cords. Two extra plies of Gum-Dipped cords just beneath the tread absorb road shocks—Firestone engineering and design give you a wide margin of safety for fast driving.

At every Firestone Dealer's, you can recognize the new Heavy Duty Balloons by their magnificent construction and by the gold stripe that stands out against the ebony black sidewalls. See your nearest Firestone Dealer to day.

TRAIL BUILDERS ENTERTAIN-
ED AT LITCHFIELD HOME

On Monday evening, July 7, a very enjoyable time was spent at the home of Mr. and Mrs. C. Litchfield, when L. M. Coombs, a brother of Mrs. Litchfield, who is visiting here from Beverly Hills, Cal., entertained the boys with a talk on Indians and Indian lore. He is accompanied by an Eagle Scout, W. M. Alexander, also of Beverly Hills and they are on a 5,000 mile motor trip which will take in the Calgary Stampede and all of the National Parks enroute.

Mr. Coombs is interested in Indian lore and is Scout Commissioner for Beverly Hills, and his talk was very interesting to the Scouts, Trail Builders and others present. They left on Tuesday for Calgary and the Big Stampede.

Those present were: Ross Mendenhall, Guy Wing, Roland Weed, Charles Bascom, Jack Grey, Winnifred Litchfield, Francis Coombs, Bert Boyson, Winston Blackmore, Noel Keith, Harold Blackmore, David Blackmore, Jesse and Francis Burrows, George and Nathan Johnson, Garth Peterson, Mrs. Georgia VanOrman, Mrs. L. Larson, Mrs. Josephine Litchfield, and Mrs. McBride.

News Notes

There are a number of people from the States visiting here with relatives and friends now.

The showers of Thursday morning, early and non of the same day were certainly refreshing. We would have liked to had them continue longer. Drops will benefit considerably despite their brevity.

1932 GRAIN JUDGING COMPETITIONS

The special boys and girls competitions committee of the World's Grain Show has formulated a set of general principles to govern grain judging competitions, the finals of which are to take place in 1932. Competitors will be divided into two classes, the junior and the inter-college. In each case a team will consist of three members and one team from each province, state or country will be allowed to compete in the finals to be held at the time of the World's Grain Exhibition and Conference at Regina in 1932. The committee suggests elimination contests in each province, state or country sometime previous to the date of the finals for the purpose of selecting the best team for each unit. Whether the team consists of boys or girls or of both is left to the discretion of the unit the team will represent. A competitor in the junior competition must be under twenty years of age and not a graduate or under-graduate. An under-graduate means a person registered for a degree course in agriculture. Competition in the inter-college class will be confined to under-graduates but there is no limitation as to age. Detailed regulations are in the course of preparation. Suitable awards will be provided. There should be a gathering of the best young judges in the world at Regina in 1932.

French River, Home of Wiley "Muskie," Will Soon Echo Cries of Elated Anglers as They Battle Fresh Water Tiger

524

A 35 LB. MUSKIE AND HIS CAPTOR

BUNGALOWS AT FRENCH RIVER

"Now is the time for all good fishermen to prepare for that summer trip" is an appropriate slogan for disciples of Isaac Walton these balmy spring days. A successful fishing trip depends largely upon the careful selection of location, tackle and even associates, for many a party has been ruined by the last-minute introduction of a "wet blanket" to an otherwise congenial collection of sportsmen.

One of the most interesting fishing streams in North America is French River, Ontario, 215 miles north of Toronto on the Canadian Pacific Railway. This lordly river is celebrated as the habitat of the fighting muscalunge, one of the gamest fish known; huge Great Northern pike, pickerel, an abundance

of small-mouth and large-mouth black bass and other finny prizes. To accommodate sportsmen and their families, a fine bungalow camp—a collection of individual cabins centering around a main clubhouse—has been erected on a cliff overlooking the river. Here the fisherman and his family can "rough it in comfort," far from the cares and annoyances of a work-a-day world.

That big "muskies" are plentiful at French River is proven by the fact that one recent summer a monster muskie weighing 55 pounds was taken in the North Channel at the mouth of the Wolseley River. Also, not long ago a party of Ohio sportsmen caught, besides their daily limit of bass, pike and pickerel, no less

than seventeen "muskies" ranging from 10 to 38 1/2 lbs. In 1926 a "muskie" of 35 pounds weight, 50 inches long and 21 inches in girth was taken in the main channel of the French, one mile from the bungalow camp.

The French River Bungalow Camp will open June 15 and remain open until Sept. 15. Jack Strathdee, its genial manager, is an experienced outdoorsman whose chief delight is coaching the uninitiated in the art of luring the fish. French River also has a fine 9-hole golf course so that devotees of the royal and ancient game who are also fond of fishing need not entirely forego the former sport in favor of the latter.

TENDERS FOR RECONSTRUCTION OF ROOF, TELEPHONE EXCHANGE BUILDING AT MAGRATH

Tenders addressed to the undersigned and endorsed as above will be received up to 12 o'clock noon of Friday, July 11th, 1930, for the reconstruction of roof of the Telephone Exchange building at Magrath.

Plans and Specifications may be obtained on application to W. C. Bruce Plant Superintendent, Edmonton or the Agent, Alberta Government Telephones, Magrath.

A deposit of \$5.00 must accompany request for Plans and Specifications covering reconstruction of roof.

Tenders must be accompanied by an accepted cheque for the sum of 5 per cent. of the amount of the Tender.

The successful Tenderer will be required to execute a Contract Bond to the amount of twenty per cent. (20 p.c.) of the accepted tender, as a guarantee for the faithful fulfillment of the Contract.

The lowest or any tender not necessarily accepted.

J. D. BAKER,

Deputy Minister of Telephones,
Edmonton, Alberta.

Dated at Edmonton,

July 4th, 1930.

Here and There

(533)

"I think that the increase in unemployment has stopped in the United States and that by the time the Fall comes around, things will be much better," declared Professor Leo Wolman, of Boston, interviewed about the S.S. Empress of Australia, on his way to the International Wage Conference at Geneva. "The worst has passed," he added, "and things are looking brighter again."

Canada's new championship golf course, the Royal York of Toronto, was opened officially May 19, in the presence of a distinguished gathering of golfers and Canadian Pacific and civil officials. George S. Lyon, Grand Old Man of Canadian golf, drove the first ball, and later in the day, the clubhouse was honored by the inspection visit of their Excellencies, Lord and Lady Willingdon. The course is in connection with the Royal York Hotel and will be at the disposal of guests.

W. R. MacInnes, vice-president in charge of traffic, Canadian Pacific Railway, since 1918, and after 45 years' service with the company, retires May 31 at his own request, and will be succeeded by George Stephen, at present freight traffic manager. In announcing the change, E. W. Beatty, chairman and president of the railway, said: "Mr. MacInnes has been in the company's service for forty-five years and has discharged his exacting duties as freight traffic manager and as vice-president in charge of traffic with conspicuous ability and loyalty to the company's interests. By his retirement the company loses one of its ablest and most respected officers."

More than four hundred varieties of apples have been originated at the Canadian Government Central Experimental Farm at Ottawa within the last 35 years. As thousands of seedlings have fruited, the apples have been tested and the best of them named and perpetuated for future production.

Five years ago the total output of petroleum in Alberta was 168,643 barrels; last year it rose to 999,152 barrels, of which 981,221 barrels came from the Turner Valley, the comparatively new field about 35 miles south-west of Calgary.

Contracts for 65 miles of extensions to the Northern Alberta Railways which run north of Edmonton through the Peace River district, have been let. These extensions are to cost \$2,350,000.

Canada exports more manufactured goods per head of the population than any other country in the world. The figures are: Canada, \$64.80; Great Britain, \$55.80; Germany, \$32.68; France, \$30.58; and the United States, \$25.13. It takes the exports of one American plus one German plus \$6.99 to equal the exports of one Canadian.

The demand for quarter sections each of 160 acres, of free homestead lands in Western Canada, given by the Canadian Government to settlers, continues to increase. In the first three months of this year there were 2564 entries registered representing 410,240 acres, as compared with 2,405 entries representing 364,800 acres in the corresponding months of last year.

And try a Recorder Want-ad. when you have anything to buy, sell, trade, or exchange. The cost is small and your message gets to the reading public so much quicker

LOST—Monday, June 20, a large blue leather ladies purse between Stone's Store and the home of W. W. Depew. Return to Mrs. Depew or Recorder Office and receive reward. 1J12.

WANTED—A good soaking rain. Any one will be well repaid who can furnish this.

HOT WEATHER DISTURBANCES

The baby is more likely to have digestive upsets during the hot weather than at other seasons. The value of breast feeding is seen at this time. Digestive disturbances do not occur as frequently in babies who are being naturally fed.

The milk for the artificially-fed baby, while it should, at all times, be carefully safeguarded, must be looked after with even additional precautions during the hot weather.

During the hot weather, milk is more easily contaminated. Flies and insects which carry infection do not hesitate to light on and bathe in the milk, and so infect it. Milk must always be kept covered and protected from flies and insects.

When milk is warm, any germs which may have found their way into it multiply at an amazing rate. If such milk is given to the baby, the heavy dose of germs which he thereby receives is apt to set up diarrhoeal conditions. Milk should be kept cold, and this means on ice. It must not be allowed to stand around in the heat for even short periods of time.

In hot weather everyone is better with less food than usual. This applies to the baby as well as to adults. Do not overfeed the baby in the summer. Do not urge him to finish his bottle if he does not seem inclined to do so. During the excessive heat, the amount of milk is better reduced for the time that the hot spell lasts. Do not forget, however, that the baby is thirsty in hot weather just as you are. He should be given plenty of cool water between feedings. Boil the water, first of all if there is any doubt as to its purity.

When the days are hot, keep the baby in as cool a place as is available. His clothing should be very light—a thin shirt and a diaper are sufficient when it is very hot. Sponge baths help to keep the baby clean and cool.

Heat rash may occur at any time. It is caused by excessive perspiration which may occur as a result of the weather or by the child's wearing too much clothing. Lighter clothing suitable to the weather should be used. The parts affected by the rash should be sponged several times a day with a solution made up of one teaspoonful of baking-soda in one pint of water.

If, in spite of all care, diarrhoea does occur it must be recognized as a condition that is serious and not to be treated lightly. Stop all feedings, give cool water to drink, and send for the doctor. If this is done immediately, the condition is checked before damage has been done, or before it has taken a firm hold.

Hot weather disturbances are to be guarded against but if they do occur, there should be no delay in dealing with them.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

Baby Chicks

Thousands of pure-bred Chicks hatching twice each week for immediate delivery. 100 p.c. live arrival guaranteed. The weather is warm, broody hens are waiting. Rush your order. Pay for the chicks when they arrive. We will ship C. O. D. subject to inspection. We guarantee our chicks.
